

upperCase

```
graph TD; A([upperCase]) --> B[Code Block]; B --> C([return fin;]);
```

The diagram illustrates the execution flow of a function named 'upperCase'. It begins with a call to 'upperCase', which leads to a code block containing the following statements: 'str;', 'rest;', 'rest2;', and 'fin;'. After these statements are executed, the flow proceeds to a return statement 'return fin;', which concludes the function's execution.

```
str;  
rest;  
rest2;  
fin;
```

return fin;
